

EDUCATION

IIIT HYDERABAD

B.TECH IN COMPUTER SCIENCE AND
MS IN COMPUTATIONAL LINGUISTICS
Expected Dec 2028 | Hyderabad, TG, IND
Current GPA (Till 4th semester): 8.03/10.00

IIT MADRAS

BS IN DATA SCIENCE AND APPLICATIONS
Expected May 2027 | Madras, TN, IND
(Online Degree Program)
Current GPA (Till 7th term): 8.78/10.00

ATREYEE DAV PUBLIC SCHOOL

AISSCE

Graduated Apr 2022 | Balurghat, WB, IND
Percentage: 91.6 %

AISSE

Graduated Apr 2020 | Balurghat, WB, IND
Percentage: 97.8 %

RELEVANT COURSEWORK

Machine Learning • Linear Algebra •
Probability and Statistics • Data Structures and
Algorithms • Algorithm Analysis and Design •
Operating Systems and Networks • Database
Management Systems • Application
Development and Software Systems • Natural
Language Processing

SKILLS

TECHNICAL SKILLS

Python • CSS • JavaScript • MySQL •
PostgreSQL • C • $\LaTeX$ • Java • TensorFlow
• PyTorch • Scikit-Learn • Numpy • Scipy •
MERN Stack • AWS • Vue • MNE

SOFT SKILLS

Team Management • Leadership • Critical
Thinking • Adaptability • Resilience •
Mentoring • Teamwork

HOBBIES

PARTICIPATING IN HACKATHONS

Member of **Team Nyay Saheli**, Finalist in
The BharatGen Generative AI Hackathon 2025. Created a RAG-Based Empathic
Legal Assistance Chatbot catered towards
Indian Women verified on real world data.

PARTICIPATING IN DEBATES

PAINTING, CRAFTS AND SCULPTURE

Trained in Painting, Crafting and Sculpting
for approx. 5 years

MUSIC

B.Mus in Rabindra Sangeet,
Also trained in Hindustani (Vocal) Classical

TAEKWONDO

Obtained 1st Dan Black Belt

LANGUAGES KNOWN

English (Proficient) • Hindi (Proficient) •
Bengali (Native)

RESEARCH

STUDENT RESEARCHER | BCCL, IIIT Hyderabad

June 2024 – Present | Advised by: **PROF. S. BAPI RAJU**

- Developing EEG-based Sleep Stage Classification, Sleep Artefact Detection and other diagnostic tools in collaboration with **NIMHANS, Bangalore**.
- Researching cognitive representations of language-based and speech-based encodings and decoding procedures based on EEG and MEG data.
- Investigating Deep Learning Models for efficient detection of multiple sleep diseases in home-based settings in collaboration with **UCL, London**

RELEVANT PROJECTS

- Vehicle Parking Platform**
Built a streamlined website for vehicle parking lot managers and users for registration of parking lots and vehicles and streamlined occupation of parking lots. (May 2025 – Aug 2025)
- Creating a basic Mixture-of-Experts Model for User specific sentence completion**
Created a basic functional Mixture of Experts model using 3 transformers specifically fine-tuned on multiple datasets suited for sentence completion, with the appropriate transformer chosen using a simple gating mechanism. (Jan 2025 – May 2025)
- Implementing a Network File System in C**
Implemented a Network File System in C having a Naming Server, a Storage Server and multiple clients with functionalities of appropriate error handling, searching of contents, caching and logging in addition to normal reading and writing of files. (Jan 2024 – May 2024)
- Comparison of the performance of different methods of POS tagging on Bidialectal Bengali text**
Calibrated four POS tagging methods—LSTM (with Adagrad, Adam, Adaboost), HMM, CRF, and MiRA—on manually generated Bengali mixed-dialect text (Jan 2024 – May 2024)

PAST EXPERIENCE

- Artificial Intelligence Sophomore Intern @ CoralComp Pvt. Ltd.**
Created a Deep Learning Based Ensemble Model for Weather Prediction on METAR data from the Middle East. Also assisted in the creation of a website to display this data in an interactive format and host the system on AWS. (Aug, 2024 - Dec, 2024)
- Artificial Intelligence Project Trainee @ NIMHANS, Bangalore**
Integrated patient devices provided by NIMHANS (Sleep and Stroke Lab) for monitoring, extracted valuable medical information from the extracted data and preprocessed the same for usage in AI models down the pipeline which are still under development (May, 2025 - Jul, 2025)
- Natural Language Processing Research Intern @ IIT Roorkee**
Was an integral part of the team under Dr. Raksha Sharma for the creation of a template-based algorithm for Fake News dataset creation and created the largest dataset (in volume) among all existing Fake News datasets for Bangla as spoken in India (May, 2025 - Jul, 2025)

ACHIEVEMENTS

- Achieved AIR 2199 in JEE Advanced 2023
- Achieved AIR 5382 (99.55%ile) in JEE Mains 2023.
- Achieved GMR 134 in WBJEE 2023, AIR 78 in IISER Aptitude Test (IAT) 2023.
- Achieved AIR 122 in IIITH UGEE 2023, AIR 112 in ISI UG Entrance Exam 2023
- Achieved State Rank of 115 in NTSE 2021, AIR 1608 in KVPY 2021
- Accepted as a JBNSTS Scholar in 2021
- National Champion (Class 8) of VVM 2019

CERTIFICATIONS

Oct 2024	IIT Madras	Machine Learning Using Numpy (by Prof. K. Thiagarajan)
Jun 2024	Coursera	Machine Learning Specialization (by Prof. Andrew Ng)
